Importance: High

Hi Manny,

My FOIA request is due today, and I turned in all documents found on Monday. Ceciley mentioned in an email yesterday that you also have documents from Blue Lake Power. Do you have anything? If so please let me know so I can figure out how to proceed. I do not think Ceciley is in today.

Subject: Looking for Information on Blue Lake Power/ Ultra Power 3 / Renewable Energy Providers

Hi all,

In order to fulfill a FOIA request, I'm looking for information on the Blue Lake Power facility, formerly called Renewable Energy Providers, and before that, Ultra Power 3. I only see the files for Ultra Power 2. The request is for materials from January 1, 1999 to March 15, 2014. If you happen to have any of the files in your possession, please share them with me so that I may scan and send off for the request. I would need them by *March 25th* if you have anything.

Thanks so much!

Hi,

Here is a list of biomass plants in northern CA. There are several more in the southern part of the state. FYI, Covanta told me that the its Oroville and Westwood plants are shutting down or have already shut down. I do not know if the shutdowns are temporary or permanent. I do not know the current operational status of the other plants besides that is in the table below. I hope this information is helpful. Feel free to contact me for more info.

Biomass Power Plant	City/Location in California	Nameplate Capacity (MW)
---------------------	-----------------------------	-------------------------

Fairhaven Power	Samoa	19
Pacific Lumber	Scotia	33
Wheelabrator Shasta Energy	Anderson	58
Sierra Pacific Anderson <i>(currently going through state/federal approval process to expand its capacity)</i>	Anderson	5
Burney Forest Power	Burney, CA	31
Sierra Pacific Burney	Burney	20
Covanta Burney Mountain Power	Burney	11
Covanta Mount Lassen Power <i>(plant is currently shutdown according to Covanta)</i>	Westwood	12
Susanville Biomass Facility	Susanville	14
HL Power	Susanville	36
Collins Pine	Chester	12
Sierra Pacific Quincy	Quincy	27.5
Covanta Pacific Oroville Power <i>(plant is currently shutdown according to Covanta)</i>	Oroville	17
Rio Bravo Rocklin	Lincoln	28
Wadham Energy LP	Williams, CA	29
Woodland Biomass	Woodland	30
Buena Vista Biomass Power <i>(under development)</i>	Rancho Cordova	19
Sierra Pacific Lincoln	Lincoln	19.2
Tracy Biomass Plant	Tracy	21.5
Covanta Pacific UltraPower Chinese Station	Jamestown	20
Sierra Pacific Sonora	Sonora	7.5
Covanta Stanislaus Inc	Crows Landing	23

Subject: RE: Do You Know of any Biomass Facilities in the Sierra Foothills of N. California?

Hi Tom,

That is an interesting question and I'm sure there are probably other biomass facilities somewhat nearby. I do know that there have been changes in the regulations surrounding biomass facilities for burning, so that might have prompted some of them to close. I'm not sure.

I have cc'd Shaheerah Kelly in our Air Division, as she works on biomass facilities and might know more in terms of where the facilities are and if there is a directory. The other source that might have good information is Cal Recycle, the state waste board. For some reason the website is not working for me right now, but you can search for biomass facilities at www.calrecycle.ca.gov

I hope this helps. Please let me know if I can answer any more questions.

Thanks,
Cara

Jean Prijatel suggested I discuss a problem with you. The Plumas National Forest is planning a fuels management project (thinning the forest and creating defensible fire breaks). They would very much like to transport biomass debris to a facility that could burn it for energy recovery. They indicated that a nearby facility, Covanta in Oroville, has closed. The project is

located close to the town of La Porte, California. Do you know of any other facilities they might be able to use? They thought the limit for cost effective transportation was about 50 miles, but I don't know how they came up with that.

Try this link. Looks interesting.

Hi.

Do you happen to have a contact for the Sierra Pacific Quincy facility that I can provide to Tom?

Do you have a contact name and number for Sierra Pacific in Quincy? If they will take wood waste from others, that is close enough to Plumas National Forest to be cost effective. Thanks.

Hi,

Here is a list of biomass plants in northern CA. There are several more in the southern part of the state. FYI, Covanta told me that the its Oroville and Westwood plants are shutting down or have already shut down. I do not know if the shutdowns

are temporary or permanent. I do not know the current operational status of the other plants besides that is in the table below. I hope this information is helpful. Feel free to contact me for more info.

Biomass Power Plant	City/Location in California	Nameplate Capacity (MW)
Fairhaven Power	Samoa	19
Pacific Lumber	Scotia	33
Wheelabrator Shasta Energy	Anderson	58
Sierra Pacific Anderson <i>(currently going through state/federal approval process to expand its capacity)</i>	Anderson	5
Burney Forest Power	Burney, CA	31
Sierra Pacific Burney	Burney	20
Covanta Burney Mountain Power	Burney	11
Covanta Mount Lassen Power <i>(plant is currently shutdown according to Covanta)</i>	Westwood	12
Susanville Biomass Facility	Susanville	14
HL Power	Susanville	36
Collins Pine	Chester	12
Sierra Pacific Quincy	Quincy	27.5
Covanta Pacific Oroville Power <i>(plant is currently shutdown according to Covanta)</i>	Oroville	17
Rio Bravo Rocklin	Lincoln	28
Wadham Energy LP	Williams, CA	29
Woodland Biomass	Woodland	30
Buena Vista Biomass Power <i>(under development)</i>	Rancho Cordova	19
Sierra Pacific Lincoln	Lincoln	19.2
Tracy Biomass Plant	Tracy	21.5
Covanta Pacific UltraPower Chinese Station	Jamestown	20
Sierra Pacific Sonora	Sonora	7.5
Covanta Stanislaus Inc	Crows Landing	23

Thanks Cara. I'll try the website next week. I should have also mentioned that I have contacted the California Energy Commission to ask if they're aware of biomass facilities nearby. While the person promised to look into it, he's been really slow in responding.

Hi Tom,

That is an interesting question and I'm sure there are probably other biomass facilities somewhat nearby. I do know that there have been changes in the regulations surrounding biomass facilities for burning, so that might have prompted some of them to close. I'm not sure.

I have cc'd Shaheerah Kelly in our Air Division, as she works on biomass facilities and might know more in terms of where the facilities are and if there is a directory. The other source that might have good information is Cal Recycle, the state waste board. For some reason the website is not working for me right now, but you can search for biomass facilities at www.calrecycle.ca.gov

I hope this helps. Please let me know if I can answer any more questions.

Thanks,
Cara

Jean Prijatel suggested I discuss a problem with you. The Plumas National Forest is planning a fuels management project (thinning the forest and creating defensible fire breaks). They would very much like to transport biomass debris to a facility that could burn it for energy recovery. They indicated that a nearby facility, Covanta in Oroville, has closed. The project is located close to the town of La Porte, California. Do you know of any other facilities they might be able to use? They thought the limit for cost effective transportation was about 50 miles, but I don't know how they came up with that.
